Acceptance Testing UAT Execution & Report Submission

Date: 03 October 2026
Team ID: 6aba117e538da4003d63184c
Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks: 4 Marks

---

1. Purpose of Document

The purpose of this document is to explain the **User Acceptance Testing (UAT)** coverage and test results of the **Script-Controlled ACL** project. The testing validates whether the implemented ServiceNow ACLs correctly control access to the u_institution_details table based on user roles, requested operations, and Branch-specific access rules.

The UAT covers **READ, CREATE, WRITE and DELETE** operations and verifies that authorized users are granted access while unauthorized users are prevented from performing restricted operations.

---

2. Defect Analysis

This section summarizes the defects identified during testing and their resolution status.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	1	0	1
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	1	2	1	4
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	**0**	**1**	**3**	**1**	**5**

Defect Summary

- **Severity 1 – Critical:** 0
- **Severity 2 – High:** 1
- **Severity 3 – Medium:** 3

- **Severity 4 – Low:** 1
- **Total Defects:** 5
- **Resolved/Fixed:** 4
- **By Design:** 1
- **Open Critical Issues:** 0

The identified defects were primarily related to ACL configuration, permission conditions and script validation. The issues classified as **Fixed** were corrected and retested before final UAT submission.

---

3. Test Case Analysis

The following test cases were designed to verify the major functionality of the ACL solution.

Section	Total Cases	Not Tested	Fail	Pass
User & Role Management	3	0	0	3
READ ACL	3	0	0	3
CREATE ACL	2	0	0	2
WRITE ACL	2	0	0	2
DELETE ACL	2	0	0	2
Branch-Based Script Validation	3	0	0	3
Unauthorized Access Testing	3	0	0	3
Final UAT Validation	2	0	0	2
Total	**20**	**0**	**0**	**20**

Test Result

Total Test Cases: 20
Passed: 20
Failed: 0
Not Tested: 0

UAT Pass Percentage

$$\text{Pass Percentage} = \frac{\text{Passed Test Cases}}{\text{Total Test Cases}} \times 100$$
$$= \frac{20}{20} \times 100$$

100%

---

4. UAT Test Coverage

Test Area	Validation Performed	Expected Result
User Login	Verify valid ServiceNow user access	User successfully accesses the system
Role Assignment	Verify assigned roles	Correct roles are associated with users
READ ACL	Test authorized and unauthorized users	Access granted/denied correctly
CREATE ACL	Test record creation permissions	Only authorized users can create records
WRITE ACL	Test record modification permissions	Only authorized users can modify records
DELETE ACL	Test record deletion permissions	Only authorized users can delete records
Branch Validation	Test ACL script against Branch value	Access follows configured Branch rule
Unauthorized Access	Attempt restricted operations	Request is denied
Final Validation	Verify complete ACL workflow	All defined requirements are satisfied
